

AllocateRite Reduces Equity Allocation, Thereby Increasing its Risk Aversion Mode in Normal Course of Allocation at 2:45 p.m. on Wednesday, September 7, 2016

During the normal course of allocation on Wednesday, September 7th at 2:45 p.m., AllocateRite adopted further risk aversion and **reduced its equity allocation by 5% to 15%** in anticipation of heightened volatility going forward and higher risk and lower reward in equities.

The new equity sector and asset allocations are included below, and are also available on the AllocateRite website at this link: <http://www.allocaterite.com/insight>.
